

## Traditional Chinese Medicine PERSPECTIVE ON LOWER BACK PAIN

According to Traditional Chinese Medicine (TCM) Theory, lower back pain can arise from two different categories of causes:

*EXTERNAL causes, such as pathogenic Wind, Cold, and Dampness.*

*INTERNAL causes, including the effects of long-term over-exertion, exhaustion, and unhealthy sexual habits.*

In addition, TCM divides the possible underlying conditions and corresponding diagnoses into two principle categories: **EXCESS** and **DEFICIENCY**.

**EXCESS** conditions mainly include:

EXTERNAL PATHOGENS  
INJURIES  
QI and BLOOD STAGNATION  
DAMPNESS w/wo EXCESSIVE HEAT

**DEFICIENCY** conditions mainly include:

KIDNEY DEFICIENCY  
KIDNEY and LIVER YIN DEFICIENCY  
SPLEEN DEFICIENCY and DAMPNES

However, after more than twenty years of clinical practice and observation of patients in America, we have learned that, even though a number of conditions can cause lower back pain, in clinical practice the majority is caused by two conditions: 1) **KIDNEY DEFICIENCY**, and 2) **QI and BLOOD STAGNATION**.

**KIDNEY DEFICIENCY**

In TCM Theory, the lower back and waist area of the body is called the *Mansion of the Kidney*. Kidney Deficiency is most likely to be due to Yang Deficiency, in which Kidney Qi, Essence, Energy, and circulation become weak or dysfunctional. In fact, it may be said that all cases of lower back pain due to External Pathogens or Stagnation are ultimately

based in, or made possible by, **DEFICIENCY**, which makes it easier for External Pathogens to invade, or Stagnation to develop. Symptoms like weakness, heaviness, stiffness, soreness, and pain will develop. At first, the symptoms are usually mild and intermittent. Then they become more severe and constant. Usually, there also is a purple color evident in the nails, fingers, lips, and tongue. The TCM principle of treatment for this kind of lower back pain is to **TONIFY KIDNEY DEFICIENCY**. Not treated properly and in time, long-term **DEFICIENCY** may lead to additional complications of Qi and Blood Stagnation. Correcting the problem of **DEFICIENCY** is the best way to deal with lower back pain and prevent recurrences. It also improves general health.

### QI AND BLOOD STAGNATION

This kind of back pain usually arises from injury or sprains, such as car accidents or improper lifting of heavy things. Symptoms are usually severe and acute. The TCM principle of treatment is to unblock Qi and Blood Stagnation. The pain will become chronic if not treated properly and in time. Long-term Stagnation of Qi and Blood may then give rise to a **DEFICIENCY** condition, just as long-term **DEFICIENCY** can lead to Qi and Blood Stagnation. That's why many individuals that we see for lower back pain have both **DEFICIENCY** and Qi and Blood Stagnation, and sometimes other related complications, as well.

As is the case in most disorders, treating the whole body to balance the entire system is the best way to treat lower back pain and prevent recurrences.
